What if editing video required *zero* *clicks?*

HANDS-FREE VIDEO EDI

01 · AI VIDEO EDITIN

No timeline. No keyframes. *No license.*

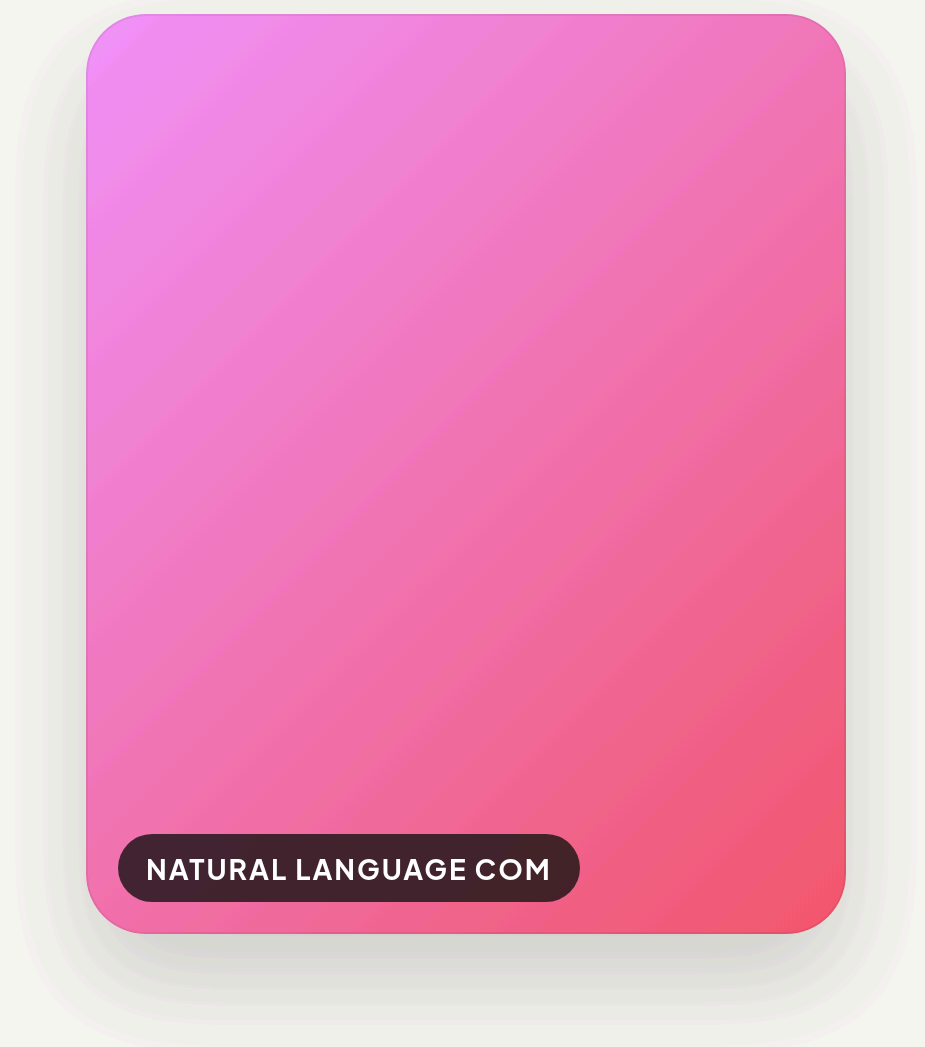

A video editing agent on GitHub now handles trimming, color grading, speed changes, and transitions through plain English instructions. No timeline. No keyframes. No Premiere Pro license.

02 · NATURAL LANGUAGE

Natural language becomes the *editing tool*

The Video Use Skill from awesome-genmedia processes natural language commands like "make the first 10 seconds faster" or "add a warm color grade to the interview segments" and executes them deterministically.

03 · COST SAVINGS VI

70–80% of editing in under *3* *minutes*

Professional editors charge \$75–200/hour. A single 5–minute corporate video typically costs \$2,500–8,000 to produce. AI agents handle 70–80% of the mechanical editing work in under 3 minutes.

COST SAVINGS VIDEO P

04 · HUMAN CREATIVIT

Creative decisions stay *human*

This is not replacing creative editors. It is replacing the 4 hours spent syncing audio, adjusting white balance, and cutting dead air. The creative decisions still belong to humans. The grunt work is gone.

HUMAN CREATIVITY VS

05 · VIDEO CONTENT E

14x video growth. Zero *bottleneck*.

Video content volume is projected to grow 14x by 2027. The bottleneck was never ideas. It was editing labor. AI agents just removed that bottleneck entirely.
