Claude Cowork has a *\$0 competitor*

ZERO COST COMPETITOR

SWIPE →

01 · OPEN SOURCE ENT

Open source AI collaboration, on *your infrastructure*

Openwork launched from YC P26 as an open source alternative to Claude's enterprise collaboration tool. You deploy it on your own infrastructure. Every conversation, every decision, every artifact stays inside your network.

02 · DATA PRIVACY EN

73% of enterprises fear their data trains competitor models

73% of enterprises using closed AI collaboration tools report anxiety about proprietary data training competitor models. Openwork eliminates that risk entirely because there is no third-party model training on your data.

DATA PRIVACY ENTERPR

03 · PRODUCTIVITY TI

40–60% faster project timelines with *AI collaboration*

Internal AI collaboration cuts project timelines by 40–60% at early adopter companies. The shift from messaging about work to doing work alongside AI is the biggest productivity jump since git.

PRODUCTIVITY TIMELIN

04 · FAST DEPLOYMENT

2 hours to deploy.
28 days to *procure*
SaaS.

Deployment takes under 2 hours on existing infrastructure. Compare that to the average 28-day enterprise SaaS procurement cycle. Your team could be collaborating with AI before IT finishes the vendor assessment.

FAST DEPLOYMENT VS S

05 · DATA PIPELINE E

Your data is free training for *their* *models*

The real cost of closed AI tools is not the subscription fee. It is the strategic data you are feeding into someone else's training pipeline, forever, for free.
