

00

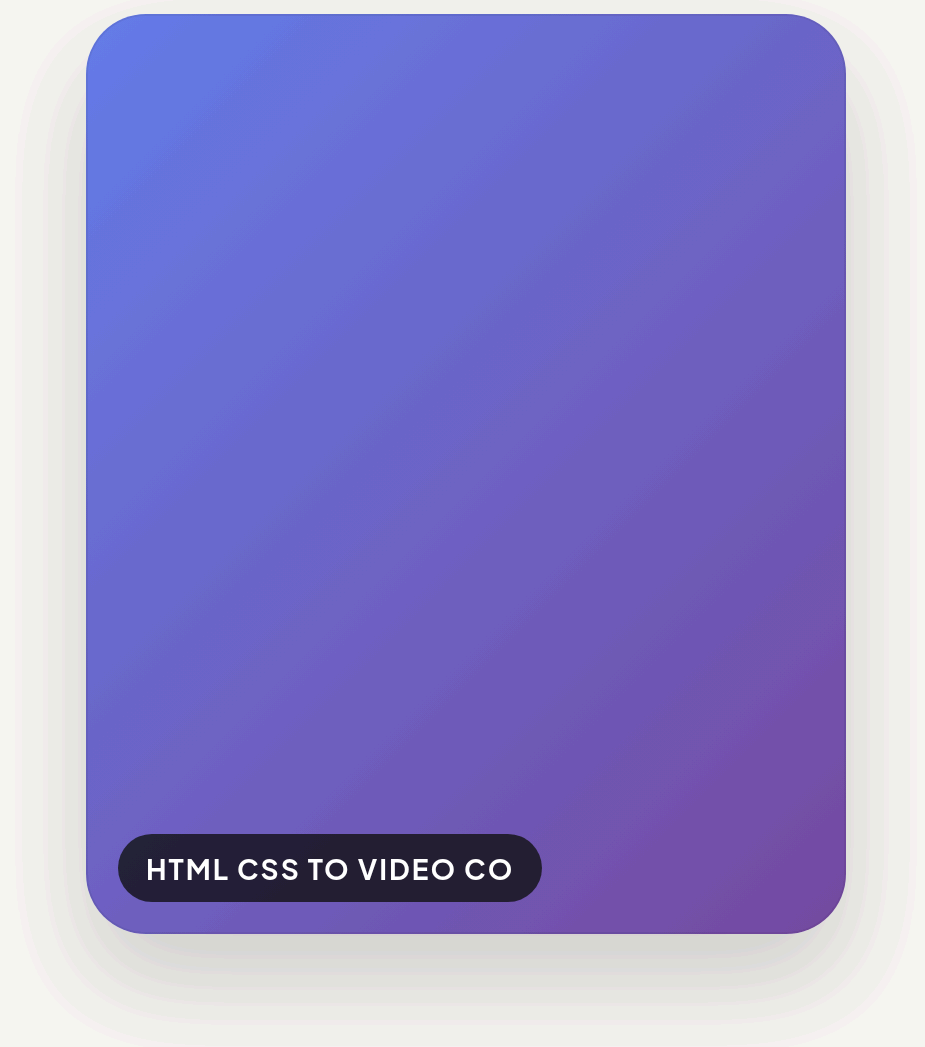

**What if your code
could *export video?***

CODE TO VIDEO EXPORT

01 · HTML CSS TO VID

HTML + CSS + Data = *Real MP4*

html-video from nexu-io turns HTML, CSS, and data into real MP4 files. Right on your laptop. No cloud service, no API costs, no rendering queues. Your code becomes a video pipeline.

02 · VIDEO PRODUCTION

**\$200–800 per
video becomes \$0**

Marketing teams currently pay \$200–800 per animated explainer video. html-video lets developers generate the same output programmatically for \$0 per video. At scale, that is a cost reduction of 100%.

VIDEO PRODUCTION COS

03 · THOUSAND VIDEOS

1,000 videos in the time it takes to *make 1*

A single Python script using html-video can generate 1,000 personalized videos in the time it takes a human editor to make one. Product demos, social content, data visualizations, all from the same codebase.

THOUSAND VIDEOS ONE

04 · LOCAL VIDEO REN

Runs locally. No data leaves *your machine.*

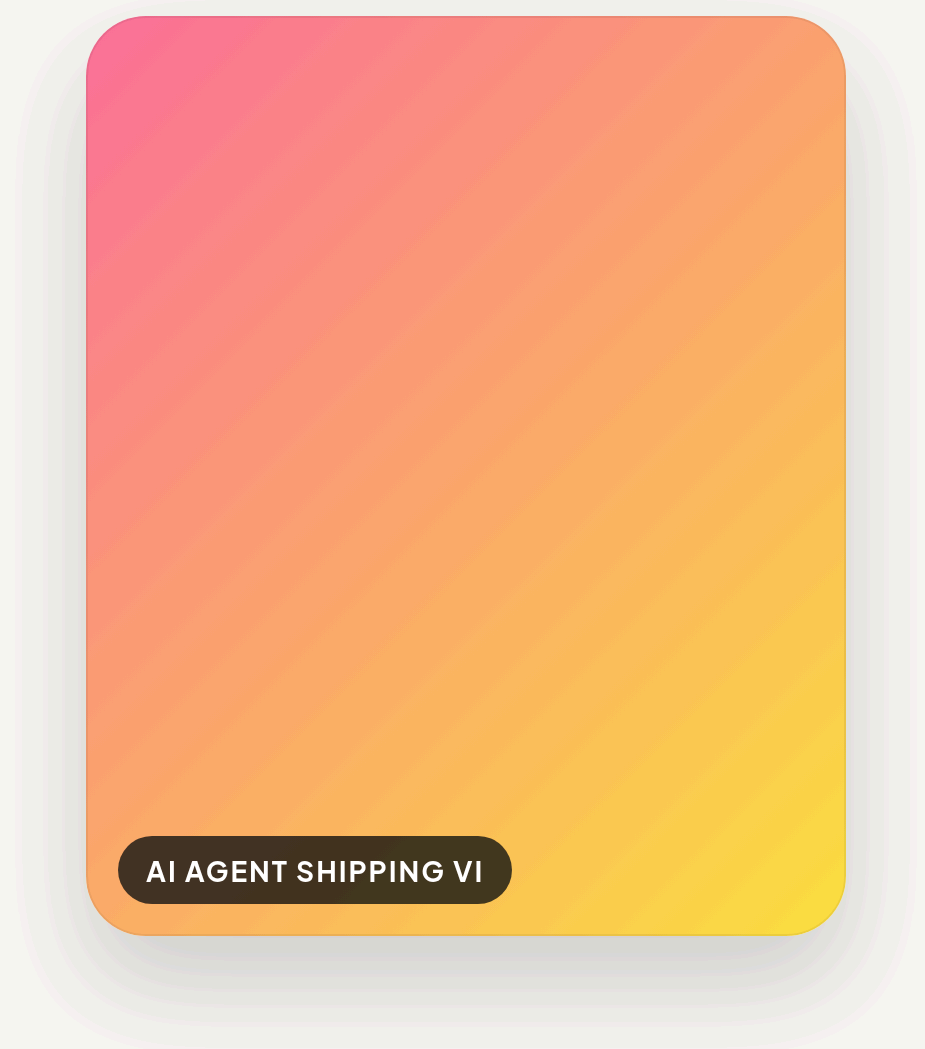

The tool runs entirely locally. Your data, your templates, your output. No uploading proprietary content to a third-party rendering service. For companies in regulated industries, this is not a feature. It is a requirement.

LOCAL VIDEO RENDERIN

05 · AI AGENT SHIPPI

Coding agents now ship finished *video products*

Coding agents can now ship finished video products. Not just the code. The actual MP4. html-video closes the gap between code and consumable media. Agents go from writing software to producing content.

**The next thing your code ships might be a video.
