BLANK CANVAS DESIGN

SWIPE →

01 · UI PATTERN GALL

200,000 real UI patterns, *indexed*

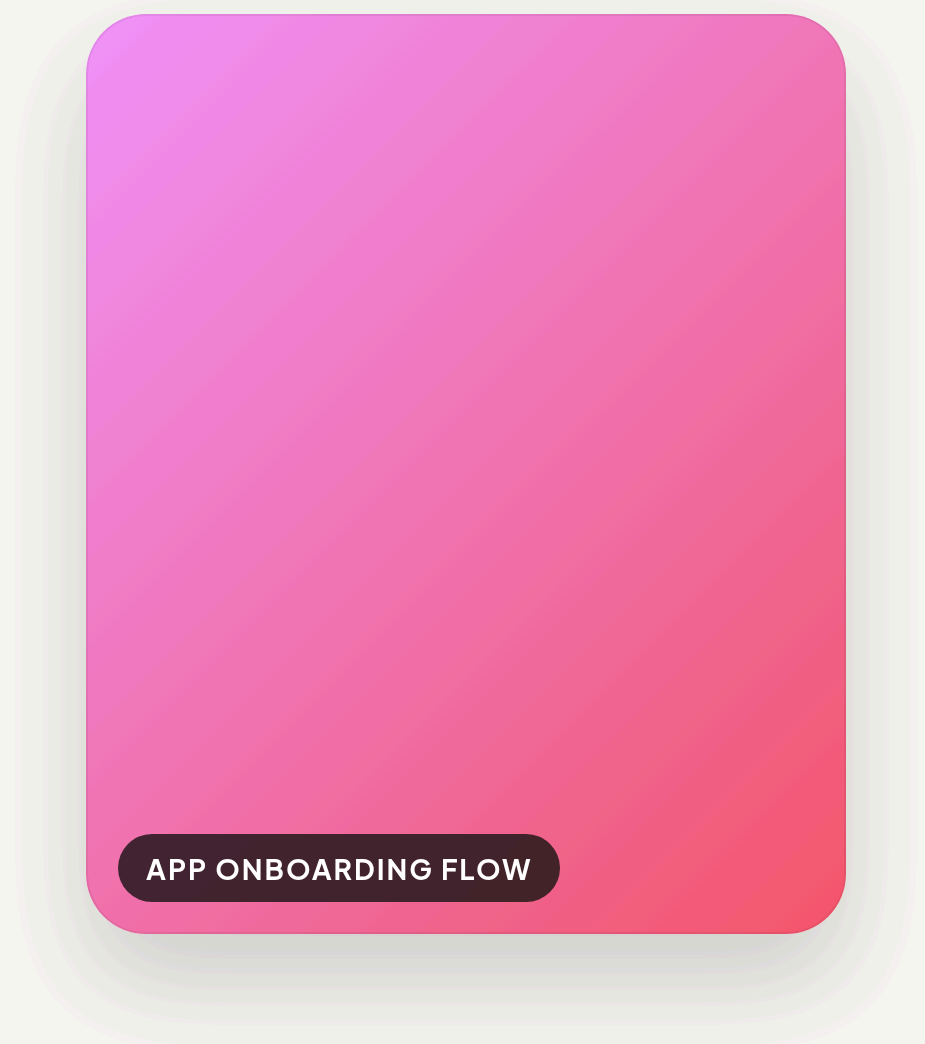

Mobbin curates over 200,000 real UI patterns from the world's best apps. Every screen, every flow, every interaction. Categorized, searchable, and timestamped. This is not a template library. It's a living archive of what actually works in production.

02 · APP ONBOARDING

23 patterns in 80% of *top apps*

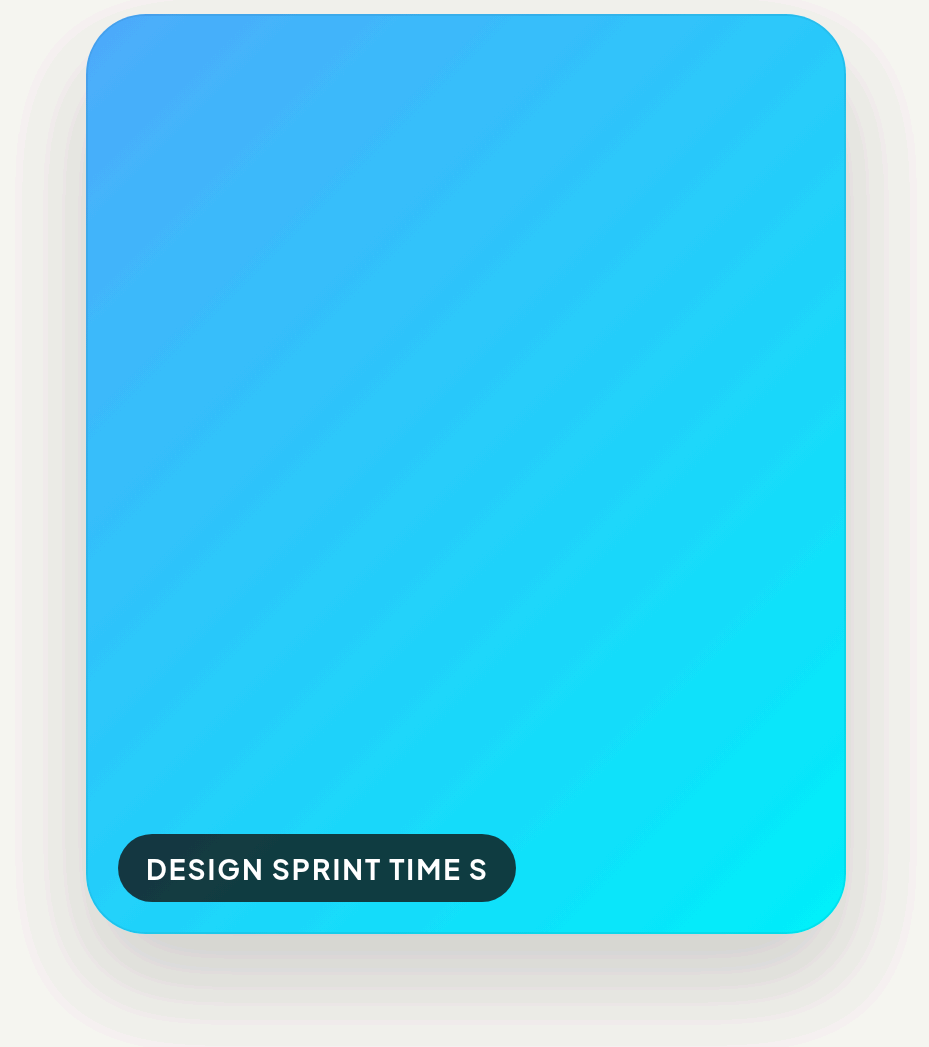

The top 1% of apps share 23 common UI patterns that appear across 80% of successful onboarding flows. Mobbin makes these patterns visible. You stop guessing what good looks like and start studying what's already proven.

03 · DESIGN SPRINT T

3 hours of browsing saves 12 hours *of rework*

Spending 3 hours browsing Mobbin before a design sprint saves roughly 12 hours of revision work. Teams that reference real patterns ship fewer throwaway screens and get to high-fidelity faster.

04 · AI DESIGN PROMPT

AI outputs grounded in *real usability*

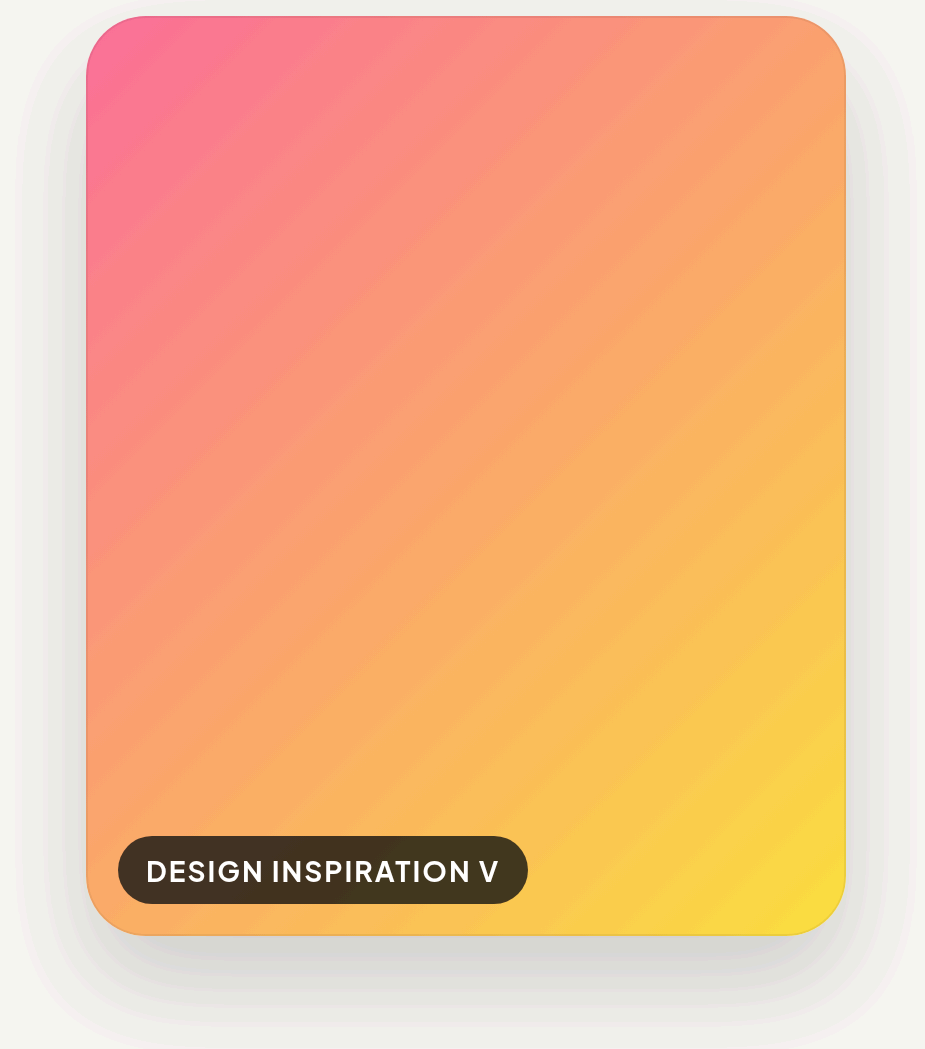

AI design tools are only as good as the references they learn from. Feeding Mobbin patterns into your AI prompt workflow gives you outputs grounded in real-world usability instead of generic templates.

AI DESIGN PROMPT REF

05 · DESIGN INSPIRATION

Informed design, not *copying*

The old way: open a blank canvas and hope inspiration strikes. The new way: search 200,000 proven patterns, pick the 3 that fit your use case, adapt them to your brand, and ship. That's not copying. That's informed design.
